Career Objective

Full Stack Developer with strong knowledge of building web applications using modern technologies. Skilled in developing responsive user interfaces, creating REST APIs, and managing databases. Passionate about writing clean and efficient code and solving real-world problems.

Education

Bachelor of Technology in Computer Science and Engineering

Jaipur Engineering College and Research Centre, Jaipur

CGPA: 8.25

2022 – 2026

Skills

Programming Languages: C++, JavaScript, SQL

Frameworks: React.js, Node.js, Express.js

Libraries /Modules : JWT (JSON Web Token), Axios, Mongoose

Databases : MySQL

CS Fundamentals: Object-Oriented Programming, Operating Systems, Database Management Systems

Soft Skills: Flexible, Team Player, Creativity, Collaboration, Adaptability, Time management

Projects

Prep Mate – AI Interview Preparation Platform: ([link](#))

- Built and maintained the **backend architecture** using Node.js and Express, handling API logic, database operations, and smooth communication between services using MongoDB.
- Integrated the **Google Gemini API** to dynamically generate interview questions and answers based on the user's selected role and experience level, making the platform more personalized.
- Implemented **JWT-based authentication and protected routes**, ensuring that only authorized users could access their data and AI-generated content securely.

Spendlix – Expense Tracker Application ([link](#))

- Developed a full stack expense tracking web application that allows users to add, update, and manage daily expenses.
- Implemented secure user authentication using **JWT and built RESTful APIs** using **Node.js and Express.js**.
- Designed a responsive user interface with React.js and integrated MongoDB using Mongoose for efficient data management.

EchoNest – Real-Time Journaling Application: ([link](#))

- Developed a **responsive and user-friendly frontend** using React.js and Tailwind CSS, focusing on clean layouts and smooth interactions across desktop and mobile devices.
- Designed intuitive UI flows that allow users to easily **create, update, and delete multimedia journal entries**, including notes, dates, and locations.
- Connected the frontend with backend APIs to enable **real-time data updates**, ensuring a smooth and consistent user experience without page reloads.

Trainings & Internships

Full Stack Web Development – UpFlairs Pvt. Ltd.

July, 24 – August, 24

- Worked on **full-stack development** using **React.js, Node.js, and Express.js**, building and connecting frontend components with backend APIs.
- Developed backend functionality including API handling and database operations, while following clean code and basic security practices. Collaborated with the team to test, debug, and improve application features during development.

Frontend Web Development – UpFlairs Pvt. Ltd. ([link](#))

September, 23 – October, 23

- Built **responsive and user-friendly UI components** using **React.js and Tailwind CSS**.
- Integrated frontend interfaces with backend APIs to display dynamic data smoothly.

Achievements

- Smart India Hackathon 2023** – Selected among the **top 35 teams** out of 200, demonstrating innovative thinking and technical problem-solving in a team-based national competition.
- Solved 300+** Data Structures and Algorithms problems
